

University Management System Manual

Aisha Ahmed, Tooba Amir, Jeremy Artun, Jumana Jaffar, Noah Micheals, Josh Slack

Dashboard:

OVERVIEW:

Displays recent activities going on and key metrics such as the total students, courses, events, and faculty currently at the University.

INTERFACE:

Displays recent registration and upcoming events, as well as notifications and alerts of changes. Students are able to view their own progress, as well as upcoming courses, and registered events. Faculty are able to view courses they teach, as well as upcoming schedules and related events. Admins are able to view key metrics at the university as well as have the options to edit events, courses, faculty, students, and subjects.

Subject:

OVERVIEW:

Displays a list of each subject, their specific code and their name.

ADMIN MENU:

Add Subject Menu: Displays menu where an admin would be able to add a new subject.

Delete Subject Menu: Displays menu where an admin would be able to select a subject from the list and delete that subject.

Edit Subject Menu: Displays menu where an admin would be able to select a subject from the list and edit that subjects code and name.

VALIDATION:

Has non-case sensitive search bar functionality.

Has error handling when no parameter/lack of parameter is given.

Has error handling when a duplicate subject code is added through add menu or edit menu.

Course:

OVERVIEW:

Displays a table view of course names, codes, lectures, sections, capacities, locations, teachers information etc. which is read and displayed from the excel file.

ADMIN VIEW:

Add Course: Implemented functionality for an admin to add a course to the table on the page.

Delete Course: Implemented functionality for an admin to select a row of course information and delete it.

Edit Course: Implemented functionality for an admin to select a row and edit all the course information in that row.

Search Bar: Any course can be searched up using the search bar.

Enrollment functionality was added in code but not implemented fully

USER VIEW:

The user is able to see the table displayed along with the search bar but does not have the functionality to add, edit or delete. The buttons for the functionality are hidden from the users.

VALIDATION:

Has non-case sensitive search bar functionality.

Has error handling when no parameter/lack of parameter is given.

Student:**OVERVIEW:**

Displays two different views depending on who is logged in:

Student: Can edit address and telephone number for their profile, can view their profile, and can change their password. These changes won't be displayed in the UI but can be accessed through the excel file.

Admin: Can add and delete a student. Adding a student creates a popup box where all text fields must be entered. This information gets added to the last row of the excel file. The delete function takes a studentId and searches the rows of the excel file until it finds a match, then removes that row.

ADMIN MENU:

Add Student Menu: Creates a popup box with several input fields to provide student information.

Delete Student Menu: Creates a popup box to take the student ID.

STUDENT MENU:

View Student Profile: Shows all the details of a student depending on the StudentId.

Change Password: Allows the student to change the default password to a personal one.

Edit Student Profile: Allows the student to change the address and telephone

VALIDATION:

Adding a student must have information in all the required fields. If not, an error message is displayed.

Confirmation message if all fields are entered correctly.

Confirmation if row is successfully deleted.

Confirmation on changing the telephone number and address field of the student.

Faculty:

OVERVIEW:

Gives options to view the faculty profiles, assigned courses, list of students and an option to edit profile. The option to edit profile is only available to faculty members.

VIEW FACULTY PROFILES:

Displays a List of all registered faculty profiles in a table

VIEW ASSIGNED COURSES:

View all courses assigned to the logged-in faculty member

VIEW STUDENTS LIST:

Displays all students enrolled in a class that you are assigned to

EDIT PROFILE:

Old, New & Confirm password

TextFields for Old, New and Confirm New password

If the old password matches the faculty user's password, and the new password matches the confirmation, then the new password will be uploaded

Upload profile pic: displays profile pic with option to upload a new one.

Event:

OVERVIEW:

Displays upcoming events and lets admin edit, delete, and add events. Students and faculty can view, search for, and register for events on this page as well.

ADMIN MENU:

Add Event: Displays a menu with text fields where the user can enter a new Event into the list.

Edit Event: Displays a menu with text fields where the user can replace or change an existing Event in the list.

Delete Event: Displays a menu with a button, where the user can hover over an existing event and delete it.

STUDENT/FACULTY MENU:

Register for Event: Button that allows students and faculty to register for events.

PAGE BUTTONS:

Calendar View: Displays a calendar with upcoming events

List View: Displays a list of upcoming events and their details

Event Registrations: Displays events in more details and allows students to register for events while admin can view registered students and edit it.

VALIDATION:

Checks if all boxes have text in them and prints an error message if any box is blank.

Will not allow duplicate events to be made through either adding or editing events, and prints an error message.

If a student is already registered for an event and tries to register again a message will appear saying they have already registered.
